

## 1943 INTRODUCTIONS

- ANACONDA** - A large flowered commercial, incurved possessing excellent substance and color. A free and easy grower, vigorous habit and resistant to disease. Forms clean, strong, medium tall stems with beautiful dark green foliage. Produces large blooms uniformly from any bud. Flowers do not shatter easily from shipping and handling. The color is a deep coppery red with golden bronze reverse, a shade very similar to the old variety David Roy. Date of maturity, November 10th to 15th. This variety will appeal to retailer and grower. It will produce two good blooms to the plant with unusual uniformity. When shaded for early October flowering the color is a rich golden copper. Recommended for its ease of culture, its high quality of blooms and its appealing color.
- APRICOT VALENCIA** - A rich apricot sport from Valencia. Blooms November 30th.
- AURORA** - A good late lavender pink single, maturing December 15th.
- CARILLON** - Carillon is a beautifully formed pink spray single. The color is a brilliant valencia pink. Its season, December 20th and later, further adds to the rapidly growing list of valuable late varieties. Form and substance are good with the flowers spaced well on rigid sprays. Growth is fast, unusually free with no blind or vegetative tendencies. Production on Carillon is extremely high and uniform. It is versatile enough to stand relatively late planting if necessary on either raised benches or ground beds.
- CASSANDRA** - A medium sized pompon fully rounded form and of excellent substance. Strong stems carrying well formed sprays. A lovely orange bronze which does not fade. Shades exceptionally well. Blooms November 5th to 10th.
- DECEMBER WHITE** - A fine incurved white commercial, with good growth and foliage. Blooms December 5th to 10th. Take terminal bud.
- EARLY OCTOBER** - A fine semi-incurved light lavender commercial. Good growth. Foliage of medium height. Blooms October 10th. Take terminal bud.
- ENCHANTRESS** - Enchantress is a beautiful deep pink anemone. As a disbud its blooms are six inches in diameter; as a disbudded spray it reaches 4-5 inches. The cushion develops fast and well, giving the variety a season of December 5th and later, just a few days earlier than that of the well known variety Dark Pink Supreme. Attains a medium height with uniformly strong stems. Growers of late 'Mums will find Enchantress a useful addition to their list of varieties. Plant June 15th to 20th. Final pinch August 1-5.
- GLORIA** - A lemon yellow incurved commercial. Matures November 25th. Take terminal bud.
- GOLDEN IMPERIAL** - A quality pompon ready to cut November 10th. The large, perfectly formed golden yellow blossoms show a deeper yellow-orange centre, a touch of distinction the market welcomes. The plant is of a vigorous upright habit, foliage clean and healthy, good branching sprays, substance and keeping qualities excellent in every respect.
- GOLDEN JANE** - A deep golden sport of Jane, maturing November 30th.
