

SUCCESSFUL FARMING IS DEPENDENT ON GOOD SEEDS.

AGRICULTURAL SEEDS.

As we hold one of the largest and best assorted stocks of any house in the Dominion, we will make a liberal allowance on all large purchases, and will not be undersold by any house in the trade.

JOHN A. BRUCE & CO.

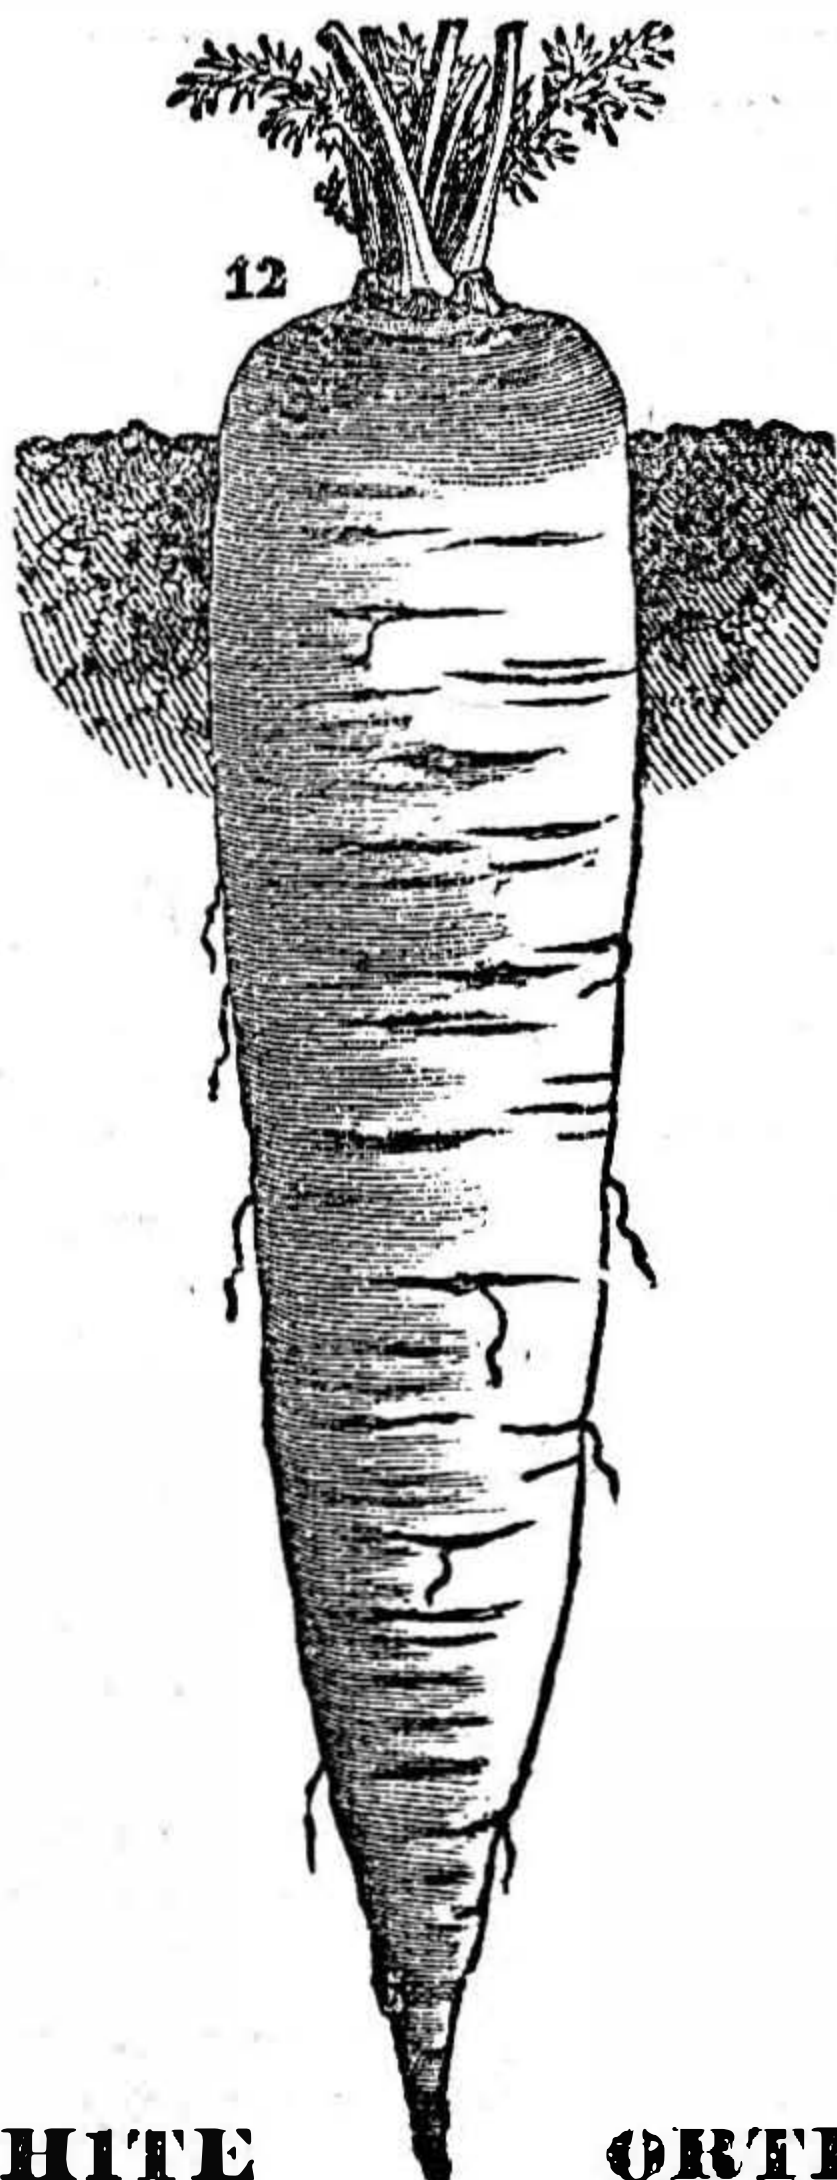

Be to call the attention of their Agricultural Friends and the public generally to this important department of their business, the rapid increase in which is a sure and satisfactory sign to us that our seeds have been above the average quality, and it is exceedingly gratifying to know that our sedulous endeavors to supply *Seeds, fresh and genuine*, have met with so much appreciation. We can only say, that we shall continue to bestow the same unremitting care which we have hitherto done in ensuring seeds of the purest quality to those who may favor us with their orders, and we feel confident that by continuing to do so, we shall meet with even a still greater increase of favor than has hitherto been bestowed upon us.

The following list will be found to contain only such kinds as have proved themselves adapted for our climate; and having been saved from the best stocks in this country and in Europe, every reliance may be placed in their purity, and the vegetating qualities of each kind being carefully tested before offering for sale, in order to prevent loss of crop and disappointment to the purchaser.

CARROT.

Saved from carefully selected Stocks, and all clean rubbed Seeds.

LONG ORANGE, large, fine quality, good for general crop	#lb., \$0 75
ALTRINGHAM, long, deep red color, excellent	" 0 75
NEW INTERMEDIATE, deep red, best for shallow soils, heavy cropper.....	" 1 00
WHITE BELGIAN, very large, generally acknowledged to be the best and most profitable for field culture.....	" 0 50
IMPROVED WHITE GREEN TOP ORTHE, improved variety of the White Belgian, with shorter and much larger roots, perfectly smooth, cylindrical, and regularly tapering to a rather stump point; it is easily pulled out, and will be found to yield very large crops.	" 0 50
