<i>Grandiflora</i> , white.....	h a	2	..	5
<i>Mexicana</i> , yellow.....	5
Aster , (<i>Compositae</i>) this splendid class of plants is not only one of the most popular, but also one of the most effective of our garden favorites, producing in profusion flowers in which richness and variety of color is combined with the most perfect and beautiful form; it is indispensable in every garden or pleasure garden where an autumnal display is desired. In our flower beds and mixed borders it occupies a deservedly prominent position, whilst for grouping and ribboning it stands unrivalled. All the varieties delight in a rich light soil, and in hot dry weather should be mulched with well-rotted manure, and frequently supplied with manure water; this labor will be amply compensated by the increased size, beauty and duration of the flowers.				
<i>Chinese</i> , various colors, mixed.....	h h a	½	July, October	5
