

LEPTOSIPHON MULTIFLORUS.

LEPTOSIPHON MULTIFLORUS—Compact growing, being 6 inches high, profuse flowering, of a brilliant copper-red. This lovely little annual will become a great favorite with all cultivators of annuals. It may be useful for all decorative purposes for which annuals are grown, and as a spring-flowering pot-plant in a conservatory will make a brilliant and effective display. Price, per packet, 25c.

LEPTOSIPHON MULTIFLORUS ALBUS.

Is similar in character to *L. multiflorus* [to which it will make an admirable companion], excepting that the flowers are of a pure snow-white.

Price, per packet, 25c

LOVE-LIES BLEEDING, [Club-headed.] A variety of the old sort with large bushy heads, 9 to 10 inches long, and five to six inches wide at the shoulder, singularly showy, and quite distinct. . . . . per packet 10 cts.

MARIGOLD ORANGE AFRICAN QUILLED, a very double variety of Marigold, with quilled petals; a striking novelty, and very showy. . . . .

MIGNONETTE-SWEET, pyramidal large flowering [*Reseda odorata ameliorata*, *R. Meliorata*, *R. pyramidalis giganta*, etc.] This is the far-famous and often-spoken-of "*Reseda en arbre*," "*Tree Mignonette*," which so many have admired, as well at the flower markets in Paris, as at our different horticultural shows; it is an improvement of the old large flowering "*Reseda Odorata*." The plant is more vigorous than the old variety; the flowers are larger, the spike longer and thicker; the leaves larger; bullate; the stems stronger, and with proper treatment the so-called "*Tree Mignonette*" will be obtained. The seed we offer now has been grown from the plants which attracted so much notice at the Great Exhibition in Paris in 1867. This is truly a grand acquisition.

Per packet. . . . . per packet, 10 cents.

NEW CRIMSON-FLOWERED GIANT MIGNONETTE.—A new variety; quite distinct from all other sorts, very robust in habit, with very large spikes of handsome flowers, of exquisite fragrance, and is a free and perpetual bloomer. We consider this to be the best variety of Mignonette in cultivation. . . . . price per packet, 25 cts.

PARSON'S NEW WHITE-FLOWERING GIANT MIGNONETTE [*RESEDA EXIMEA*].—The flowers are almost pure white, of the most exquisite fragrance, and borne in spikes of six inches to a foot in length. It may be grown either as "*Tree*" or "*Dwarf*," but it is especially valuable for the latter mode of cultivation. As a proof of its excellence, it may be added that it has this year received First-class Certificates from the Royal Horticultural, Royal Botanic, and other Societies. . . . . Price per packet, 25 cts.

NEW CRIMSON-FLOWERED MIGNONETTE.

MIMULUS CUPREUS HYBRIDUS WHITE GROUND.—Very remarkable strain of *Mimulus cupreus hybridus*, white or flesh-colored-white ground, spotted, blotched and stained with scarlet purple. . . . . per packet 25 cts.
