FOR SOWING

Wheat, Oats, Hemp, Barley, Buckwheat, Grass Seed, Rice, Flax, &c.

(Direction for using, inside of each machine.)

THE HAND MACHINE,

Sows from Four to Eight Acres per Hour at a Common Walking Gait Throwing out Wheat about Forty Feet Wide.

Price, - - - - - - - - - $7.50 each.

WETHERSFIELD SEED DRILL.

In structure this is a simple, compact and durable SEED SOWER. It adapts itself to every form and size of seed, makes its own drill, distributes with eveness, screens the seeds from dispersion by the wind and clogging by the rain, covers perfectly, and gently presses the earth down to secure that close contact of soil essential to quick germination. The perfect precision and certainty of every part of the process, enables the cultivator to sow his lands in exactly the variety and proportion of crops he wishes, and secures uniformity throughout.

It is worked by cast iron reeds instead of with a brush. They vary in size from No. 1, suitable for Corn, Beans, &c., to No. 8, which is used in sowing Turnips and similar seeds.

Price,.....$6.00.
